DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 16-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 2 of U.S. Patent No. 6,618,550 in view of Moon et al (6,721,493).

The difference between each of claims 16-19 of the present application and claim 2 of U.S. Patent No. 6,618,550 is that claim 2 of U.S. Patent No. 6,618,550 does not specifically recite the still picture information and additional audio stream are recorded in a first area as that being recited in claims 16-19 of the present application. Moon teaches a recording/ reproducing apparatus for recording the audio stream and still picture information on a recording medium, the audio stream and still picture stream are recorded in the same data area and management information is recorded in a management area (Fig. 2). It would have been obvious to one of ordinary skill in the art to modify claim 2 of U.S. Patent No. 6,618,550 with Moon by

recording the audio stream and still picture in a first area thereby easily accessing the still picture information and a corresponding audio stream.

Further for claims 17-19, claims 2 of U.S. Patent No. 6,618,550 as modified with Moon teaches means or steps for recording and reproducing the still picture information, audio stream and management information on and from the medium (See Moon column 5).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Parulski teaches apparatus for recording audio and still image signal on a medium.
